

*Focus on the essentials*

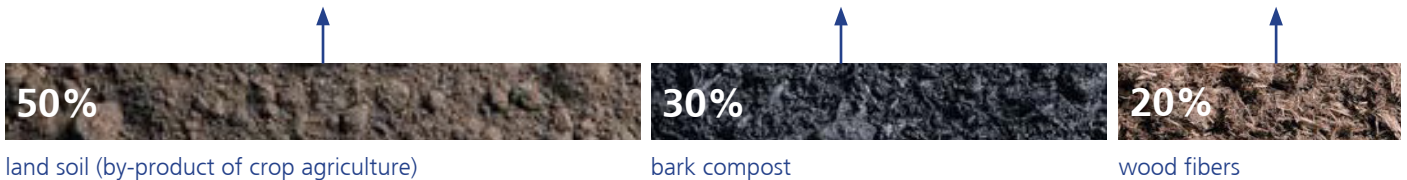

VIRIdiVITA richsoil is a concentrate of local, natural products for enriching highly mineral substrates. This rich soil enables plant growth.

**rich – valuable – local**

## VIRIdiVITA richsoil

### **purpose:**

- enriching poor substrates
- greening system with mineral and organic components to promote plant growth

### **function:**

- retains rainwater
- peat-free
- offers structural and networking elements to promote ecological diversity

### **advantages:**

- nuanced mixtures on site enable individual responses to ecological requirements and the desired initial greening density

### **technical data:**

~ 7.3	pH value (H <sub>2</sub> O)
~ 1.4 mS/cm	conductivity (salt content)
~ 800 kg/m <sup>3</sup>	material weight dry according to EN 12580
~ 1400 kg/m <sup>3</sup>	material weight saturated according to EN 12580
50%	mineral content
