

Be smart - choose complete

VIRIdiVITA complete completes the range of water-retaining VIRIdiVITA products. Following the motto 'no surface is too small to be valuable,' the pre-greened storage mat covers, for example, bike and bus shelters. Every surface helps to retain water and improve biodiversity.

simple - clean - easy to handle

VIRIdiVITA complete

- Purpose:** - The quick, complete solution with a sedum mat for the active enhancement of flat roofs and roofs with a low pitch.
- Function:** - Absorbs, retains, and returns rainwater to the nature, either through plants via their roots or through evaporation into the atmosphere - especially for roofs that are intended to be green from the start with minimal substrate depth.
- Competitive Advantages:**
- Natural soil structure
 - No use of geotextiles and standing water
 - No wind erosion due to the bonding of all layers—from the roof to the vegetation
 - Suitable for lightweight construction systems due to minimal weight
 - Green roofs from the start
- Variants:**
- In conjunction with the water storage mat VIRIdiVITA premium roof
 - In conjunction with the water storage mat VIRIdiVITA light

premium roof:

Dimensions in cm:
200 x 100 x 9
Custom mat thicknesses
available upon request

Weight (dry):
~27.5 kg/m²

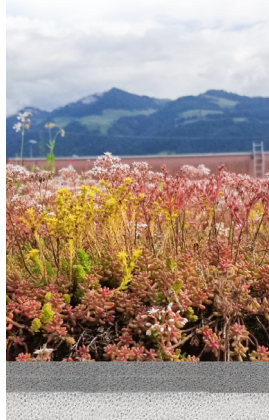

Weight (saturated):
~74.5 kg/m²

light:

Dimensions in cm:
200 x 100 x 6
Custom mat thicknesses
available upon request

Weight (dry):
~26.7 kg/m²

Weight (saturated):
~48.5 kg/m²

Delivery in individual components.
Installation and maintenance instructions must be followed.
